Israel Securities Authority

Tel Aviv Stock Exchange

Dear Madam/Sir,

**Re: The Company will receive 1.1 million shekels from a pilot with the Council of Transporters funded by the Ministry of Environmental Protection**

The company is honored to report that on 15 November 2022 a message was received regarding winning a "Call for Proposals", published by the Innovation Authority, with funding from the Ministry of Environmental Protection (MoEP) in an amount of around NIS 1,128,000 for a first-ever pilot project to be carried out by the Company in cooperation with the Council of Transporters, the MoEP and transport companies in Israel.

The pilot is intended to implement the Company's technology in order to reduce the movement of trucks travelling empty on Israeli roads, to calculate greenhouse gas (GHG) emissions in real time and to digitalize.

Within the framework of the pilot, an analysis of big data and optimization of the various vehicle fleets will be carried out using the Trucknet platform; this is in order to decrease the mileage of trucks travelling empty and to calculate and to reduce GHG emissions from the trucks.

As mentioned above, the pilot will be conducted in cooperation with the Israel Council of Transporters and will focus on shipment of containers in Israel. The Trucknet platform will analyze the information received from a number of carriers and will carry out smart matches between empty trucks (travelling without cargo) and containers that require transportation.

The project is to be completed in October 2023. Funding will be paid to the Company in a few installments during the pilot period.

Yours Sincerely,

Trucknet Enterprise Ltd.

Signed by: Hanan Fridman, Chairman of the Board and CEO
